

## **Input New Military Funeral Honors (MFH) Mission into TAPS Database Process: To track mission output within a State using the Tribute Assistance Planning Service (TAPS) database**

### **Description**

The creation of a new MFH mission within the TAPS database helps each State/Territory and ARNG Soldier and Family Support Division (ARNG-HRS) to track the number of missions. This includes: information about the deceased Soldier/Veteran/Retiree, requested honors, funeral location and date, participants in the MFH, and certain costs endured by the ARNG. This information allows for each State/Territory to determine availability of their Honor Guard Soldiers and the number of military funerals held, both conducted and supported, within their State/Territory.
